VZ-LS-2026-GEN01 · Living Systems · Genesis  
sub-series · Origin canvas

**STUDIO RESERVE · GENESIS SUB-SERIES**

Not for sale · On view by appointment

Genesis is the origin canvas of the Living Systems body of work and the first painting of the Genesis sub-series. A dense cellular field in cobalt, cerulean, and mint blue · cells reading at once as biology, biography, and memory · is held inside an irregular ground of hand-applied 24k gold leaf. At the center, a cluster of hand-carved spheres orbits a cobalt sphere whose crown is touched in gold. A single gold filament loops outward, tying the system together.

Within Living Systems, Genesis names the moment before motion · the first cell, the first system, the instant biology becomes biography. Its pendant in the inventory is Origin / Inheritance I, Work 01 of the Inheritance sub-series · the rupture forward. The two works are intended to be read as a single arc.
